The Envi "Buzz"

November 2010

Robin's View

Ingenuity is alive and well.

If all you did was watch the news you would be depressed too. While the media and politics are busy telling everyone how bad things are, they are missing many of the positive seeds that have been sprouting during these trying times.

Seeds that will propel us forward and bring in a new era of economic and personal growth.

People are suffering, but if you look close enough you find many that have decided to make lemonade out of lemons. They are quietly building the basis for future growth.

I know they are out there, because I speak with them every day. There is an entrepreneur in Canada who is introducing a whole new way of not only saving energy, but capitalizing these savings so that they help fund your retirement savings as well. There is a new company that installs a proprietary technology that creates savings by simply reprogramming the duty cycles of equipment. Or, I can tell you about the guy who is installing a new coating on windows that not only saves energy, it creates it as well!

All over you can find new innovations, you just have to look. I am confident that 15-20 years from now we will look back on this period

The Envi make a great gift for the holidays.

Rather than the usual gifts, why not give a gift that EMPOWERS your family, friends, customers, clients, employees or stakeholders.

Giving an Envi for the holidays allows the recipient to save and is an out of the box idea that they will remember. It further reinforces your commitment to energy efficiency and a better future.

[We have developed special corporate gift programs for companies wanting to give the gift of savings this year.](#)

A basic Envi energy monitoring kit is only \$129 and includes everything you need to monitor energy use in real time.

Or take advantage of the [special multi-pack](#) offer below.

"New device monitors every penny spent on power."

By Local 6 Orlando

The Envi was recently installed by Local 6 Orlando in a consumer's home with high electric bills.

The home owner had no idea this type of device existed. The report clearly shows how much all the individual appliances were costing, and the benefit of a real time in home energy display. [Click here for report.](#)

Come visit us at the 2011 CES Show in Las Vegas
Booth # 26106/26107

January 6-9 2011
Las Vegas

See the latests and the greatest at the world's largest consumer electronics tradeshow.

MULTI UNIT GIFT PACK SPECIAL

Buy Now

Buy Three Standard Envi kits for \$327. We will even include a free USB cable so you can upload data to Google PowerMeter using your computer. This is a savings of \$90 over the regular price. [Click here](#)

Offer Expires: November 30, 2010

Web Bridge Release Update

With the deployment of thousands of web bridges over the past month, it has been quite a busy time. We now have shipped all back ordered bridges. If you have not received yours, please contact us right away.

There were glitches in the programming of this first batch of bridges, but with your patience and help, we have been able to isolate the faulty bridges and re-program them. If your bridge is not working correctly, please let us know, so that we can make arrangements to have it re-programmed.

Overall we are extremely pleased with the performance of the web bridge and have gotten many positive reviews that it was worth the wait. You can order a web bridge for \$69.

The Envi Installer Network for North America is Now Active.

You can check find your nearest dealer and or installer [here](#).

If you want to be listed on our network please send in this [dealer application](#). if you previously sent in an application to be listed, please check to make sure you are listed properly.

A new study shows that despite our advances in technology for appliances from refrigerators to televisions -- technology that has helped cut the energy consumption of appliances by as much as half -- we still consume as much energy as we did in the early 1970s.

Web Bridge Installation Instructions

[Web Bridge Installation Instructions](#)

The Web Bridge comes complete with one new Power supply that will power both the Bridge and the Envi monitor, one monitor connection cable and one Ethernet cable for connection to the router.

Installation Instructions:

1. Connect Web Bridge to the Envi using short cable.
2. Connect Web Bridge to the Router using supplied Ethernet cable.
3. Disconnect power to the Envi display and remove power supply.
4. Connect new power supply to the Web Bridge and both the web Bridge and Monitor should turn on. (The monitor is now powered by the Web Bridge)
5. Activate the bridge online. Activation of the bridge is done by registering the bridge [here](#). You create an account, enter the bridge serial number and then activate Google PowerMeter under device settings.
